

Florida International University is a Top 50 public university that drives real talent and innovation in Miami and globally. From the top of the globe to the ocean's floor FIU researchers are exploring the toughest challenges of our time: sea level rise, childhood mental health disorders and more. This solutions-center approach is why FIU is designated a Carnegie Very High Research institution, the only public university in South Florida to achieve this distinction. Half sprawling city, half tropical wilderness, all progress. We're proud to call Miami our home. It's a dynamic hotspot for innovation and creation. This multilingual, multinational city puts the "I" in FIU. Where others see challenges, we see opportunity. Our research and service efforts take aim at the unique issues Miami faces in climate change, globalizing economy, major population shifts and more.
